

## 15 TECHNIQUES OF MANIPULATION USED TO OBTAIN WHAT IS WANTED AT THE EXPENSE OF OTHERS (... NOT TO BE USED)

- 1 Divide and conquer, let 2 persons argue or fight to gain the advantage, by depleting their energy levels
- 2 Play victim to acquire power because when someone claims to be a victim, nobody will attack or contradict them
- 3 Blame someone for being dangerous to censor, Pretending a danger becomes a fact against which to absolutely fight
- 4 Disparage someone to convince of being inferior, by pretending some are unworthy or unsophisticated
- 5 Create a problem or a division to come up with ones own solution, and being seen as a savior
- 6 Create a story with some elements of truth to gain an advantage, He who controls the narrative has the power
- 7 Declare that the world has changed to impose a docile attitude, force to abandon the past without review and trust a new leader
- 8 Animalize ones opponent to inspire rejection, thus allowing mistreatment with the support of a large number
- 9 Blame someone else of ones own action so that ones legitimacy is intact and ones way to proceed remains hidden
- 10 Create a story with some elements of truth to gain an advantage with the help of a 3rd party to give credibility
- 11 Attack others not to be attacked, by creating a surprise and a paralysis effect, which blocks critical thinking and puts in inferiority
- 12 Buy someone with one of the human motives to render them obedient, all is needed is to know which motive fit best to someone
- 13 Explain the purpose of ones action to actually serve other hidden goals, for which the effort of others will be used
- 14 Increase fear in others, to gain their obedience and support and to let them correct the non complying ones for you
- 15 Inspire fear and menace to let others ignore an existing solution, by proposing a new solution, presented as mandatory

This list is not exhaustive, it however covers parts of the methods which are used to weaken the world to the benefit of a few having a very incomplete picture of what those underlie and what they imply. Very many problems could be avoided in the world if those using these methods understood and got aware that other simple actions and ways of thinking would work more efficiently and create less damage to reach somewhat similar goals. If you are facing one or more of the above traits, you can consider that the originator principally acts **by fear of not obtaining or not acquiring**, and that this sick game is a trap for themselves.

They put themselves extremely dependant of those habits, addicted as a drug user up until total blindness or madness.

Those using such techniques should more inspire pity for not using their confidence, free will and creativity than be blamed. **They live in permanent fear of losing.**
